## How to write Iso files to CDs or DVDs

Iso files are images of complete CDs or DVDs, compiled as one whole image file (\*.iso), just like Norton Ghost does for hard disk drives and partitions. Iso images can be loaded into several different CD/DVD recording software packages to create CDs or DVDs.

### Using ISO Recorder Power Toy (freeware)

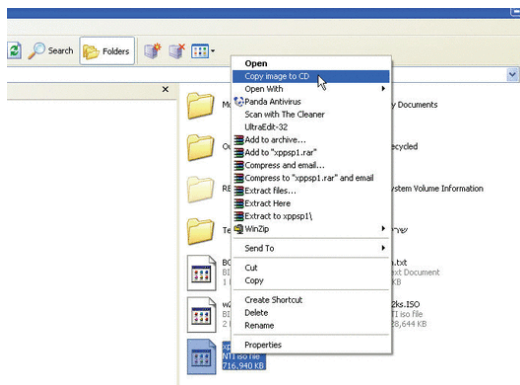

ISO Recorder Power Toy is a Windows® XP freeware utility that uses native Windows® XP functions to write images to a CD. When the program is installed, it is automatically associated with the \*.iso file extension in Windows® Explorer.

For more information about this utility, go to:

<http://isorecorder.alexfeinman.com/isorecorder.htm>

### Procedure

1. Download your Iso CD image to a folder on your computer.
2. Insert a blank CD, DVD, or Blu-Ray disc in your CD-RW/DVD-RW/Blu-Ray drive.
3. Start Windows® Explorer.
4. Locate the Iso file, right-click the file name, and then click **Copy image to CD** to open the ISO Recorder Wizard.

5. Follow the steps in the wizard to write the image to the CD.

## NOTICE TO CUSTOMERS

### Alternate procedure

1. Right-click your CD-R/CD-RW drive and choose **Copy Image to CD**.

2. In the new window, browse to the Iso file and click **Next**.

### Note

This power tool works only on files with \*.iso extension. There are some Iso files with \*.img extension (notably MSDN's distribution files). Change the extension to \*.iso and this power tool will work as advertised.

### Using EasyCD/DVD Creator 2009 (Roxio)

You can use EasyCD/DVD Creator to create a CD or DVD from an Iso file. You must purchase this program from Roxio. When the program is installed, it is automatically associated with the \*.iso file extension in Windows® Explorer. For more information about this program, go to:

<http://www.roxio.com>

### Procedure

1. Download your Iso CD/DVD image to a folder on your computer.
2. Insert a blank CD, DVD, or Blu-Ray disc in your CD-RW/DVD-RW/Blu-Ray drive.
3. Start Windows® Explorer.
4. Locate the Iso file, right-click the file name, and then click **Open to start Creator 2009**.
5. In the **Write Method** section of the **CD/DVD Creation Setup** dialog box, click **Disk at Once** for optimum recording performance.
6. Click **OK** to write the image to the CD/DVD.
